

Mike Kirsch from Preferred Communications handled our order, shipment and install from start to finish. All of the equipment, (Getac S400 computers, docking stations and mounts for four different patrol vehicles) arrived within weeks of placing our order. There were no missing parts and the install was probably the neatest and most professional job we have experienced. Our patrol officers are very happy with the speed and performance of the Getac S400 and the strength and durability of the Gamber-Johnson docking stations and mounts.
