

Sat Station Desktop Iridium Docking Station for 9555

Equipped with all the exciting features of the SatStation Hands Free Dock (hands-free voice and data communication), this version is conveniently designed to lay on a flat surface and blend into any professional environment. Available for the Iridium 9555 satellite phone.

Enjoy all the features offered by the SatStation Hands Free Dock (hands-free voice and data communication) without the installation! This desktop version of the SatStation Hands Free Dock is ideal for the office or home and portable situations.

It is efficiently designed to lay on a flat surface and blend into any professional environment or command center. While in hands free mode it is great for conference calling. When the phone rings you can hear it loud and clear with a built in loudspeaker.

The SatStation Desktop allows for better communications and the benefits of a fixed phone with a portable option! Since the dock is charging your satellite phone, you will have a fully charged phone ready to be used either at your command post or underway.
