

Thuraya XT

Thuraya XT, the world's first IP54/IK03 certified satellite phone, has arrived. Splash resistant, dust protected, and shockproof, Thuraya XT is the most rugged handset combining satellite phone functionality with the technology of the Thuraya network.

Thuraya XT lets you stay close. Wherever you are within the Thuraya coverage area, however remote the location, you're never more than a phone call away.

Rugged Design

Using the latest durable polycarbonates for the outside case, the Thuraya XT is, quite simply, the most durable satellite phone on the market - the Thuraya XT's IP54/IK03 rating is a globally recognized standard.

Internet-On-The-Go

The handset's GmPRS capability means you can easily send/receive emails and browse the web with your laptop or PC from anywhere, at download/upload speeds of 60/15kbps. Fax and data speeds are 9.6kbps.

Compact and Lightweight

Weighing only 193g and measuring just 128 x 53 x 26.5mm (h x w x d), the Thuraya XT is incredibly compact and lightweight, but heavy on features and reliability.

Text On Product Features
